

Energy-efficient new homes

Why choose an ENERGY STAR® qualified home?

A comfortable
home that saves
on energy bills

**20 percent more energy-
efficient than a typical home**

The ENERGY STAR label means energy efficiency and energy savings.

ENERGY STAR qualified windows keep you warm in winter, cool in summer.

More insulation in the walls, floor and attic maintains even temperatures and keeps noise out.

Additional insulation will make a finished basement a perfect retreat for you and your family.

A ventilation system provides fresh air for healthy living and reduces indoor air pollutants.
